

2015 SNEC \$200 TRAVEL AWARD RECIPIENT

JULIANNE ROSSET

Education

M.S. in Environmental Conservation from the University of Massachusetts, Amherst – expected in December 2015

B.S. in Environmental Science from the University of West Florida

Research

Currently studying adult alewife migration and resultant spawn timing as well as the relationship between environmental characteristics and juvenile alewife growth/mortality in 20 coastal Massachusetts lakes

JULIANNE ROSSET

Research

In the past Julianne has worked at:

- *The Bermuda Institute of Ocean Sciences*
- *The Mattie Kelly Environmental Institute, Florida*

She helped to save sea turtles and water fowl from the Deepwater Horizon Oil Spill

As an undergrad her volunteer work helped local scientists better understand the effect of biogeochemical and physical variables on benthic organism respiration in a local bayou

Professionalism

Julianne has presented her work at several conferences, is humbled to have been the recipient of multiple awards along the way, and looks forward to 2015 AFS in Portland!
